

COMMUNICATION

Impact by Coronavirus Disease

Dairago (Italy) March, 2020

Dear Sirs,

Coronavirus diffusion scenario has fast evolved all over the world, causing huge concerns among all world population and many doubts about the world wide future.

The attention is mainly focused on people's safety and health, but in the same time we have to think about the economy's next future.

The big challenge for industrial Companies is to combine working restriction with ability to satisfy Customers who are still active in orders and deliveries.

The situation has forced the Authorities to regulate citizens' life and movement, creating strong attention on public opinion about the risks related to social contacts.

For the same reason all the Companies authorized to operate during this period, are forced to improve all the protections for workers still in the plant and in the offices.

To the present day, **WIZ CHEMICALS IS AUTHORIZED TO OPERATE** by the Italian Authority. As a consequence, in this difficult moment, it introduced some guide lines such as:

- 1) All WIZ employees and workers are allowed to safely reach the working place
- 2) All the working spaces are re-organized to reduce as much as possible people contacts
- 3) The production area and the warehouse are arranged in dedicated shifts in order to reduce people contacts and in the same time to guarantee a high level of production
- 4) WIZ is promoting home office for its employees, to guarantee daily activities by remote devices, phone, mail, video conference
- 5) WIZ adopted a specific policy to assure safe operation inside the plant and in the meantime cooperating with forwarding agents to take all precautions to ensure goods' pick-up and delivery
- 6) WIZ is doing its very best to respect the production program and the delivery time agreed with the Customers
- 7) Due to the restrictions and controls at the Italian borders, WIZ strongly suggests to Customers to plan in advance the orders program

Considering the world evolution scenario is of course not under our control, we would like to state that this Communication has to be intended as guarantee of a correct and rational approach to the contingent problem and of WIZ's commitment to actively monitor the situation, doing its best to minimize all the risks this crisis is causing.

Thank you for your attention.

WIZ chemicals S.r.l.
Dr Guido AZARIO (CEO)
